

Design-Build Bay County Fire Stations

PANAMA CITY, FL

Provided turn-key design-build general construction services for the installation of two temporary fire stations after the devastation of Hurricane Michael.

PPS provided turn-key design-build general construction services for the installation of two temporary fire stations following the damage of Hurricane Michael in Bay County, FL. PPS utilized Sprung post-tension fabric structures to expedite delivery of emergency response vehicle bays along with modular sleeping quarters and office space for local fire station personnel.

Projects included full vehicle exhaust systems, remote communications and emergency response notification, site-civil improvements, and requirements for compliance with Miami-Dade building standards.
