

Emergency Power Upgrades

KENNEDY SPACE CENTER

Provided installation services of 3 new 800kW diesel generators, paralleling switchgear and 12 downstream ATS's.

OWNER/DEVELOPER	45th Force Support Squadron
-----------------	------------------------------------

MAGNITUDE RANGE	\$1M-\$5M
-----------------	------------------

PPS performed the demolition and installation of a new Emergency Power System at Jonathan Dickinson Missile Tracking Annex (JDMTA).

This project required the demolition of five existing gensets and replacement with three new 800kW gensets, paralleling switchgear and automatic transfer switches.

This project utilized Tier 4 gensets and required meticulous outage scheduling in conjunction with the radar's mission.
