

Building Automation System

PANAMA CITY, FL

PPS is responsible for the installation of the raceway, networking, and communications wiring for the HVAC systems amongst several buildings.

This system is responsible for the automation, remote control, and interlocking of the buildings HVAC systems. It also interconnects with the lighting automation and fire alarm systems. PPS is responsible for installation of the raceway, networking, and communications wiring, in addition to wiring up sensor and control devices for the HVAC equipment. Devices include flow meters, pressure meters, temperature sensors, variable frequency drives, interlocks, dampers, isolation valve controls, power supplies and building metering. PPS will assist with setting device addresses and system acceptance testing.
