

Design-Build 100,000SF Hangar

HILL AFB, FL

PPS was the designer of record for this complete electrical installation of two 54,827SF TAMS and a 15,111SF connecting structure.

PPS is the electrical designer of record and turn-key electrical contractor for the installation all electrical infrastructure and equipment for two Temporary Aircraft Maintenance Structures (TAMS).

PPS was responsible for including a secondary electrical service from a 2500kVA transformer as well as a new 4000 AMP switchboard. The SOW also included the installation of distribution panels, two 400Hz systems, lighting systems, fire alarm raceways, communication cable trays and raceways and an aircraft grounding system.
